02 Nov 2026, 00:29 UTC

Test transport event 30: action verified by reading Jira back

07 Limitations

- Based only on Jira records the app could read at snapshot time.
- 1 open question was recorded and remains unresolved here.
- Only actions marked Verified were read back from Jira by the backend.
- A completed decision means the approved Jira actions were applied and verified. Engineering work they track (for example a created issue or a migration) may still be open in Jira.
- This is an audit-style decision record — not a legal, compliance or cryptographic certificate.
