Review retirement of MOBL-58

Live mode record · Completed

Evidence captured 03 Nov 2026, 02:53 CET. Full snapshot available until 04 Nov 2026, 02:53 CET.

IN SHORT

- Option chosen: **Migrate first** (Pass).
- **1 of 1 proposed Jira action** verified by reading Jira back.
- Jira transition: currently refused by the workflow validator (reason below).
- No open questions recorded.

About this record

Generated by ANTICIPATE from a Jira snapshot readable by the requesting user. Not a legal, compliance or cryptographic attestation.

01 Decision overview

Change
MOBL-58

Selected option
Migrate first

Verified actions
1 of 1

Jira transition, checked when this record was loaded · Closed · the validator refuses it

MOBL-58 cannot move forward because the option chosen in plan plan-3d6ca859-6855-4852-8a4b-f4376bff45d9 assumes work that Jira does not show as done yet (consumers still depend on it). Update the Jira links once consumers have migrated, then re-run the plan. Open ANTICIPATE, review the consequences and complete a verified prevention plan.

07 Limitations

- Based only on Jira records the app could read at snapshot time.
- No open questions were recorded; unread evidence may still exist.
- Only actions marked Verified were read back from Jira by the backend.
- **The recorded outcome does not authorize the Jira transition.** The workflow validator still refuses it until Jira shows the work this decision assumed.
- A completed decision means the approved Jira actions were applied and verified. Engineering work they track (for example a created issue or a migration) may still be open in Jira.
- This is an audit-style decision record — not a legal, compliance or cryptographic certificate.
